The Germs STOP HERE in 5th Grade!

Mrs. Bollendorf's 5th grade learns about the importance of proper hand hygiene. Using our Smart Boards for instructions and invisible UV lotion, students were instructed on the proper way to wash their hands. The students applied the gel on their hands and under the black light the children were able to see microorganisms typically missed during regular hand washing. They then washed their hands the way that was instructed and checked again to see the missing microorganisms!

Students learned using best practice hand washing procedures will help to reduce the spread of infections and food borne diseases.
